Adult Forensic Information

A forensic examination with an adult is strengthened when history and collateral records are available. If the adult is emotionally stable and capable of reading at a sixth grade level, please notify me so that I may provide a "Forensic History Questionnaire" for them to complete. For adults with severe emotional disturbance or extremely low intellectual functioning, a knowledgeable parent or guardian may be able to complete most of the sections of the "Forensic History Questionnaire." In any case, records for the following would be useful for the evaluation of your client:

1. Social history
 - a. Family/institutional history
2. Educational history
 - a. College and schools (by grade)
 - b. IEP or 504 placement and written plans
 - c. Discipline history and records
3. Work history (if any)
4. Medical history (Primary Care Physician/Pediatrician and/or Parents)
 - a. Delivery and/or developmental issues
 - b. Prior or present hospitalization history
 - c. Current conditions
 - d. Current medications
 - e. Vision or auditory problems
5. Behavioral health history
 - a. Prior psychological evaluations
 - b. Prior counseling records
 - c. History of sexual/physical/emotional abuse
 - d. History of alcohol or substance abuse
6. Legal history
 - a. Police report, charge, client statement, and related filings for the current offense
 - b. Prior offense records
 - c. Prior probation reports
 - d. Prior competency issues, reports and records
 - e. Current adult and/or juvenile incarceration records (if applicable) including adjustment

Thank you for your assistance. Please contact me with any questions.
